DrRacket Version Tool

Version 9.4.0.3

October 26, 2026

`(require version/tool)` package: `drracket`

The `version/tool` library implements a DrRacket tool that

- makes the patchlevel display as a version p⟨*N*⟩ suffix in DrRacket (though the base verion reported by `(version)` is not changed);
- if enabled by the user, periodically checks whether a new Racket distribution is available for download.
